## 6" Water Pump Pulley - Part# 1016108

The 6" polished Underdrive Pulleys can reduce water pump RPM and dress up the front of your engine. These pulleys are CNC machined from billet 6061 T-6 aluminum bar stock and cut with performance lightening holes to reduce weight. The 6" Underdrive Pulley fits all 20R/22R/22RE/RET engines and is polished to a high luster finish.

- Can be used with the stock harmonic balancer or our 4" power pulley.
- Not recommended for low RPM applications such as rock crawling.

**Installation: Follow service manual for removal and installation of belts and torque specifications.**

1. Remove fan, fan clutch and belts.
2. Remove stock pulley and replace with LC Water Pump Pulley.
3. Install fan and fan clutch assembly.
4. Replace belts and tighten.
