## LC Aisin Carb Adapter - Part #1033003

This billet air filter adapter will provide the ability to run the K&N (or similar) 2" x 11" free flow cleanable air filter on the stock 2-barrel Aisin Carburetor found on 1981-1995 22R engines.

**Instructions:** Start by making sure you will have hood clearance before proceeding. Remove the stock air filter and center filter stud from the carburetor. Using a 6mm Nylock nut, install the new filter stud and tighten the nylock nut against carb body to hold the stud in place. For a dust proof seal, apply a small amount of silicone between the filter adapter and the carb. Install air filter, flat washer and nut. Tighten enough to snug air filter without over tightening.
