Pro Flow Exhaust System (Pre Runner Style) - Part #1042020
3RZ Tacoma 1995 – 2004 w/Standard Cab Only
2WD & 4WD Pre Runners
(Exits in front of rear wheel)

The Pre-Runner style exhaust fits 95-04 3RZ Tacoma 4wd and 2wd pre-runners (6-lug). It will only fit standard cab models. With a shorter exhaust and unique tailpipe design this aggressive exhaust is the perfect choice for off-roading or high performance applications.

Installation (See attached diagram):

1. Remove the stock exhaust system from behind the catalytic converter. Be careful not to damage the hangers or brackets.
2. Retain one of the original rubber hangers from the stock system. You will need 1 of these to re-hang the new system.
3. The pre-runner system is designed to mount to the original cat, and loop over the frame rail to exit in front of the rear tire. (Passenger side)
4. Mount the new exhaust system to the cat using the original bracket and mount. (Mounts just like the stock one) Use the new gasket supplied in the kit.
5. The j-shaped hanger supplied in the kit will mount to the outside frame rail body mount. This will line up with the original hole.
6. The clamp-on hanger mounts just above the chrome exhaust tip. Hook end facing the ground.
7. Install your original, saved from step 1, rubber mount between the 2 hangers and adjust them to achieve the correct alignment and tension.
8. Tighten all bolts.
