3RZ 12lb Billet Aluminum Flywheel (Lightweight) Part #1051002

Rev. It Up!!! Install you new lightweight billet aluminum flywheel and watch the tach climb faster than ever!

When installing you new flywheel you will notice we supply a small steel ring. This ring keeps the bolts heads from damaging the aluminum center. Be sure to install this ring on the pressure plate side of the flywheel (Do not install between crank and flywheel!!). Torque all bolts to factory specs and you are ready to go.

Remember LC Engineering also sells new wear pads and hardware kits.
